A photograph of a road intersection. A red '3' and an asterisk are placed on the right side of the road, near the intersection, to indicate a specific location for data collection. The background shows a grassy hill with wind turbines under a blue sky with clouds.

A photograph of a road intersection. A road curves from the bottom left towards the top right. On the left side of the road, there are utility poles and a yellow building in the background. On the right side, there are bushes and a building. Two red arrows point to specific locations on the road: one labeled '11' points to the left side of the road, and another labeled '10' points to the right side of the road. The sky is blue with large white clouds.

A photograph showing a gravel area between two stone pillars. On the left, a road is visible. In the background, there is a house with a red roof. Red arrows point to the pillars, labeled 18 and 19.

A photograph of a road intersection. A paved road with white dashed lines curves from the bottom right towards the center. To the left of the road is a gravelly area with sparse vegetation. A red arrow labeled '20' points to a small patch of ground in the gravel area. Further back, a red arrow labeled '21' points to a small orange structure or shed near a stone wall. In the background, there are trees and a building with a red roof.

The left photograph shows a T-junction where a road from the left meets a main road. A convex mirror is mounted on a pole at the junction. A red 'x 32' is marked on the asphalt. The right photograph shows the main road curving to the right, with a hillside town visible in the background under a cloudy sky.

A photograph of a road with a concrete curb and drainage grates. Red handwritten marks are visible on the curb and the road surface.

A photograph of a road intersection. A paved road on the left curves towards the center. A dirt path branches off to the right. Red 'x' marks are placed on the road surface: one near the bottom left edge, one near the center of the intersection labeled '6', and one further down the dirt path labeled '5'. The background shows trees and a cloudy sky.
